EDUCATION

University of North Carolina at Chapel Hill - Chapel Hill, NC May 2028

Bachelor of Science in Public Health in Environmental Health Science, Bachelor of Arts in Data Science

GPA: 3.78 • Dean's List (Fall 2024, Spring 2025, Fall 2025)

Relevant Coursework: Environmental Engineering, General Chemistry I & II with Quantitative Laboratory, Calculus I-III, Linear Algebra, Epidemiology, Public Health Foundations, Evolutionary Biology, General Statistics, Information Science Foundations

LABORATORY EXPERIENCE

UNC ECUIPP Lab - Chapel Hill, NC January 2025 - Present

Undergraduate Research Assistant

- Optimize low-cost lead testing strips by refining acid concentrations to improve lead extraction and detection in water and diluted soil samples.
- Prepare spiked soil samples to simulate lead-contaminated soil and evaluate extraction efficiency.
- Validate lead concentration results using ImageJ software to assess test strip accuracy. Conduct ICP-MS analysis to quantify the concentration of lead in solution.
- Presented research project on improving soil testing instructions, creating multiple infographics and video iterations on sampling soil for community partners. Performed literature review on instructionals and created survey evaluation.

PROFESSIONAL AND LEADERSHIP EXPERIENCE

River Network - Boulder, Colorado January 2026 - Present

Drinking Water and Infrastructure Resource Development Intern

- Research and synthesize information on drinking water and wastewater topics to create 3-4 digestible fact sheets.
- Develop 2-3 page fact sheets on topics including private wells and decentralized systems, water utility privatization, climate disaster impacts on drinking water, and capital improvement planning.
- Engage in biweekly staff meetings to collaborate with various teams, coordinate research deliverables, align research with the organization's standards and aesthetics, and incorporate feedback from members.
- Organize content using a standardized template and utilize Canva to create digestible, clear content for broad audiences.

Renewable Energy Special Projects Committee - Chapel Hill, NC September 2024 - Present

Renewable Energy Project Collaborator

- Led a $65,500 proposal to install 1.6 kW solar-powered tables on campus, collaborating with a landscape architect on strategic placement based on accessibility, usability, and integration into campus.
- Developed and presented proposal, including budget, timeline, and environmental impact analysis. Secured funding and approval, guaranteed installation of solar panel-powered tables, accessible for student use.
- Currently collaborating on a project to implement a solar-powered battery system for mass spectrometry labs.

Women and Underrepresented Genders in STEM Promoting Inclusion in Research Experience - Chapel Hill, NC September 2024 - Present

Social Media, Communications, and Public Relations Intern

- Designed 12+ Instagram posts and outreach flyers, growing following by 6% in 3 months and generating 14,500+ views to increase visibility among underrepresented high school students.
- Boosted profile activity by 50% and profile visits by 46% in 3 months through targeted digital campaigns, driving 160+ content interactions and strengthening community engagement.
- Optimize website design to enhance online user experience and distribute marketing materials online and in person.

SKILLS

Coding & Laboratory Skills: R, Stata, and Python for data analysis & programming, micropipetting, preparing dilutions, laboratory safety training, quantitative reasoning, and scientific presentation.

Digital & Design Skills: Skilled in Microsoft Office Suite, Google Workspace, Canva, Creative Cloud applications, and CapCut for data presentation and digital design.
